

URGENT CARE *OR* EMERGENCY ROOM?

Get the **RIGHT CARE** at the **RIGHT PLACE** and the **RIGHT TIME**.

URGENT CARE

If you need to be seen for minor injuries or illnesses, and your primary care physician is not available, visit an urgent care center. They are ready to help you with:

Minor injuries and cuts requiring stitches.

Upper respiratory infections, flu, fever and sore throat.

Fractures of small bones like fingers or toes.

Skin rashes and infections.

Eye and ear infections.

Other non-life-threatening conditions.

EMERGENCY ROOM

Visit an Aultman emergency department as soon as possible for these symptoms:

Stroke or heart attack symptoms.

Chest pain or difficulty breathing.

Deep cuts or bleeding that won't stop.

Fractures of large bones.

Pregnancy-related problems.

Knife or gunshot wounds.

Coughing or vomiting blood.

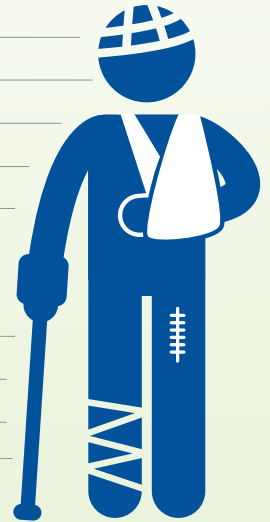

Severe burns.

Loss of consciousness or seizures.

Abdominal pain.

Head injuries or injuries from falls.

Evaluation of urgent behavioral health needs.

Dial 911 if you are experiencing these symptoms and need an ambulance.
